

## Loudoun CPS - Sandra Glenney's typical psychologist

When you enter the world of Sandra Glenney, CPS and their psychologists, you have entered a very malicious and very immoral world; a world based on the irrational. It is a world of cheap judges and cheap psychologists. Gigi Jordan, pictured above, attended therapy along with her son with the typical CPS psychologist. Sandra Glenney, center of right photo above, selects the psychologist who will testify for Loudoun County CPS. She takes great measures to ensure that the psychologist will see things her way.

The typical CPS psychologist will believe any accusation, as does Glenney, of abuse no matter the lack of evidence or absurdity of the accusation. In the case of Ms. Jordan, she attended sessions with Dr. Ellen Lacter. Dr. Lacter believed and reported that Ms. Jordan's child may have been abused. Instead of assisting Ms. Jordan with her delusions, Dr. Lacter encouraged her; the results were disastrous for the child. The worse thing a psychologist can do to a mentally unstable parent is to encourage the parent in their irrational claims of abuse.

If you are not familiar with the case, Ms. Jordan killed her son because she believed he was being abused by the child's father. It is important to point out that Dr. Lacter is a member of the International Society for the Study of Trauma and Dissociation (ISSTD). It is worth your time to read about the organization and their [beliefs](#). They believe and embrace the concept of dissociation, which is a throwback to the story of "**Sybil**" and multiple personality disorder. MPD is a very

controversial diagnosis and most professionals consider it junk science. Many members still believe in the concept of Satanic Ritual Abuse, ISSTD is a fringe organization.

The story is relevant to Loudoun Child Protective Services and Sandra Glenney in that Sandra Glenney uses Dr. Joyanna Silberg, who also happens to be a member and past-president of ISSTD. Dr. Lacter believed the accusations made by Gigi Jordan. Psychologists that embrace disassociation and Satanic Ritual Abuse are harmful to their patients. Their methods are not scientific and lack credibility. Much like psychologists utilized by Glenney, they have no ability to discern between true or false allegations; neither does Glenney.

In the case of Sandra Glenney, she intentionally seeks out therapists like Dr. Lacter, Dr. Silberg and Dr. Mary Lindahl . The therapists are dangerous to children and families. Any parent or attorney can locate a psychologist to reinforce their position and they can be sure that the psychologist will testify to anything that the attorney desires. It is a very disturbing and dirty aspect of the field of psychology.

Keep in mind that the psychologist used by Glenney and CPS has only one priority and that is to support CPS;the priority is not the best interest of your child. The case of Ms. Jordan demonstrates that certain psychologists, the type that Sandra Glenney uses, destroys families. It cannot be overstated that Sandra Glenney will select a very undesirable and poorly trained psychologist. You and your attorney must get the psychologist removed from the case as quickly as possible.
